Chapter 4 - JISF core services

- JISF Core Service

JISF Core Service

Core service is defined as a common reusable component of e-service that is used by almost all e-service developed/used by the Bangladesh government which is shared to e-service as a reusable component as service. JISF will do all kinds of maintenance on core service and e-service connected to JISF will use core service.

Core service includes:

1. Single-Sign-On (SSO)
2. Single Logout (SLO)
3. GEO
4. Court
5. Judge
6. Court Stuff
